

Finn's Amazing Rainforest Adventure!

Grab your binoculars and join Finn the dolphin on a journey to the lush, green rainforest!

- Rainforests are very warm and wet places that stay green all year round.
- The canopy is the thick top layer of the rainforest where many birds and monkeys play.
- Rainforests grow near the middle of the world, called the Equator, where it is lovely and hot.
- Many colorful animals live in the rainforest, including bright frogs, jaguars, and parrots.
- Rainforests are full of tall trees and plants that love the regular rain.
- It is important to look after our rainforests because they are home to so many different creatures.

Did you know? Did you know? Rainforests are like the Earth's lungs! They help keep our air clean and fresh for everyone to breathe.
