

Finn's Green Ocean Adventure

Learning objective: To understand how we can look after our environment and keep our world clean and sustainable.

Help Finn the dolphin keep his ocean home clean! Use the word bank to label your picture, and draw the items that help us look after the planet.

Draw: Draw a large, friendly ocean scene. Include Finn the dolphin in the center. On the left side, draw a sandy beach with a recycling bin. Include natural elements like seaweed and coral. Add a reusable bottle near Finn. Ensure the drawing style is bright, simple, and cheerful, using colored pencils or crayons.

Label words: recycling bin · clean water · seaweed · reusable bottle · sun

Steps:

1. Step 1: Draw Finn the dolphin swimming in the middle of your page. Draw a piece of rubbish in the water and a recycling bin on the sandy shore. What should we do with the rubbish?
2. Step 2: Draw a reusable water bottle next to Finn. Why is using a reusable bottle better than using a plastic one that we throw away?
3. Step 3: Draw a bright yellow sun in the sky. How does the sun help the seaweed grow in Finn's home?
4. Step 4: Label your drawing using the words from the word bank.

5. Step 5: Draw one more thing you do at home to help look after the planet, like turning off a light.
