

Finn's Weather Adventure

Learning objective: To identify and describe different types of weather and understand how weather changes in our environment.

Look at the picture of Finn the dolphin exploring the coast. Color in the different types of weather you see! Use bright yellow for the sun and soft grey for the clouds.

Colour this: A friendly dolphin character named Finn is jumping out of the sea. The sky is split into three sections: on the left, a large bright sun with rays; in the middle, a fluffy white cloud; on the right, a dark cloud with simple raindrop shapes falling towards the ocean waves. Finn is smiling and waving a fin. The scene includes simple outlines of a sandy beach, a small palm tree, and the blue ocean with gentle curved lines for waves.

Steps:

1. Label the sun in your picture.
2. Label the rain cloud in your picture.
