

Max's Shape-tastic Garden

Learning objective: To identify and name common 2D shapes: circles, squares, rectangles, and triangles.

Help Max the monkey finish his garden! Color in the shapes using the code: Color all circles red, all squares blue, all triangles green, and all rectangles yellow. Then, answer the questions below.

Colour this: A clean, bold-lined drawing of Max the monkey standing in a garden. Max is holding a magnifying glass. The garden is made entirely of simple 2D shapes: the sun is a circle, the flower petals are circles, the house in the background is a square with a triangle roof, and the garden path is made of rectangles. There are clear, thick outlines for each shape to make them easy for children to color in.

Steps:

1. Label one of the circles in the picture.
2. Label one of the triangles in the picture.
3. Label one of the squares in the picture.
