

Max the Monkey's Geometry Flashcards

Learning objective: To identify, name, and describe 2D and 3D shapes using mathematical vocabulary.

Read the front of the card to guess the shape or property, then check the answer to see if you are correct! Use these to test your friends or family.

I have 4 equal sides and 4 corners. What shape am I?	I have 3 sides and 3 corners. What shape am I?
A Square	A Triangle
I am a 2D shape with no corners and one curved edge. What shape am I?	I have 4 sides, but my opposite sides are the same length. What shape am I?
A Circle	A Rectangle
I am a 3D shape that looks like a dice. What shape am I?	I am a 3D shape that is perfectly round like a ball. What shape am I?
A Cube	A Sphere
I am a 3D shape with a apartment circular base and a curved side. What shape am I?	What do we call the corners of a 2D shape?
A Cylinder	Vertices
How many faces does a cube have?	True or False: A triangle has 4 sides.
6 faces	False (It has 3 sides)
Max the Monkey is holding a tin of beans. What 3D shape is it?	I have a square base and 4 triangular sides meeting at a point. What shape am I?
A Cylinder	A Pyramid
