

Max the Monkey's Spooky Math Adventure

Help Max the Monkey sort his fall harvest! Can you count the spooky treats?

- Max has 3 shiny orange pumpkins and finds 2 more. Now he has 5 pumpkins altogether!
- If a small pumpkin costs £1, and you have two, that makes £2 to pay.
- Look at the spooky spider webs; can you find the pattern of circles and lines?
- Sort the fall leaves into piles of big and small to see which pile has more.
- Count the black cats on the fence: one, two, three, four, five!

Did you know? Did you know? Pumpkins are actually a type of fruit! Max loves to count the seeds inside them to practice his big numbers.
