

Max's Magical Time Garden

Tick-tock, tick-tock! Can you help Max the Monkey track the time?

- The sun rises in the morning and sets in the evening.
- There are seven days in one whole week: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, and Sunday.
- A clock has two main hands: the long one for minutes and the short one for hours.
- We use the word 'yesterday' for the day that has already finished.
- We use the word 'tomorrow' for the day that is coming next.
- Max the Monkey checks his clock to make sure he is on time for his favorite math games!

Did you know? Did you know that a day has 24 hours? Even while you are fast asleep at night, the earth is busy spinning around, getting ready for the sun to rise again for a brand new morning!
