

Nova's Bright Bonfire Night

Learning objective: To learn about the traditions of Bonfire Night and develop fine motor skills through coloring.

Get your brightest crayons or pencils ready! Color in the scene below, thinking about the warm colors of the fire and the sparkling colors of the fireworks in the night sky. Once you are finished, practice your writing by labelling the parts of the picture.

Colour this: A large, friendly illustration featuring Nova the owl perched on a sturdy tree branch in the foreground. Below Nova, in the center of the page, is a large, crackling bonfire made of logs and flickering flames. The night sky above is filled with different shapes of fireworks, including large starbursts and long, trailing sparks. Nova is wearing a small, cosy knitted scarf. The outlines should be thick and clear for easy coloring. Ensure there is plenty of white space in the sky for the children to add their own firework patterns.

Steps:

1. Label the bonfire in your picture.

2. Label a firework in the sky.
