

Springtime Wonders with Bea the Bee

Wake up with the flowers and discover the magic of Spring!

- **Spring is the season when the weather starts to get warmer and the cold frost melts away.**
- **New green buds appear on the trees and colorful flowers like daffodils begin to bloom.**
- **Many baby animals, such as lambs and chicks, are born in the Springtime.**
- **The days feel brighter because the sun is higher in the sky and shines for longer.**
- **Bees come out to visit the flowers to collect nectar, helping the plants to grow.**

Did you know? Did you know? In Spring, the days get longer and the sun stays out to play for more hours than it does in Winter. This extra sunshine helps all the tiny seeds in the ground wake up and start to grow!
