Zara the Zebra’s Colourful World of Kandinsky

Get your brushes ready! Let’s explore the magical shapes and colours of Kandinsky’s art.

- **Wassily Kandinsky was an artist who loved to paint bright shapes like circles, squares, and triangles.**
- **He used abstract art, which means his paintings do not always look like real people or places.**
- **Many of his famous paintings show groups of colourful circles inside larger squares.**
- **He chose his colours carefully to show how he felt, just like how we choose different voices to sing happy or quiet songs.**
- **You can create your own Kandinsky-style art by drawing overlapping shapes and filling them with bold colours.**

Did you know? Did you know that Wassily Kandinsky could 'hear' colours? He believed that every colour had its own special sound, like a musical note. When he painted, he felt like he was composing a beautiful song on the canvas!
