

Finn's Guide to a Greener Planet

Be a Planet Hero! Small changes make a big difference.

- Sustainability means using things carefully so there is enough for people in the future.
- We save energy by turning off lights when we leave a room.
- Recycling helps us turn old paper and plastic into brand new items.
- Walking or cycling to school instead of using a car helps keep our air clean.
- Using a reusable water bottle saves money and stops plastic waste.

Did you know? Did you know? Finn the dolphin loves clean oceans! If we recycle our plastic bottles, they do not end up in the sea, keeping Finn's home safe and beautiful for everyone.

Key vocabulary: Sustainability · Recycle · Energy · Environment · Resources · Conserve
