

## Max's Magical Division Station

Get ready to divide with Max the Monkey! Can you share fairly?

- Division means splitting a total number into equal groups.
- The symbol for division is the  $\div$  sign.
- When we divide money, every person gets the same amount of £.
- If you have a leftover number after sharing, we call it a remainder.
- Max always checks his work by counting his groups to be sure they are equal.

*Did you know? Did you know? Division is the opposite of multiplication! If you have 12 bananas and share them into 3 piles, you get 4 bananas in each pile. This is the same as saying 3 times 4 equals 12!*

**Key vocabulary:** Share · Equal · Divide · Group · Remainder
