

Max's Spooky Shop Maths

Learning objective: To solve simple one-step problems involving addition and subtraction of money within £10.

Help Max the monkey work out the prices in his spooky shop! Colour the items and solve the maths challenges below.

Colour this: A friendly scene in a forest shop. In the centre, Max the monkey is standing behind a wooden counter. On the counter, draw a large round pumpkin with a funny face, a small toy spider with long legs, and a jar of sweets. In the background, draw a few autumn leaves and a bright, smiling moon. Provide thick, clear outlines for the pumpkin and spider so children can colour them orange and black. Add a small price tag next to the pumpkin with the number '3' and a price tag next to the spider with the number '2'.

Steps:

1. Label the pumpkin in the picture and write its price of £3 next to it.
2. Label the spider toy in the picture and write its price of £2 next to it.
