Max’s Market Stall Challenge

Learning objective: To solve problems involving the addition and subtraction of money in Australian dollars and cents.

Max the monkey is opening a fruit stall. Help him calculate his prices and change. Use the word bank to help you spell. Follow the steps for each question carefully.

Word bank: pounds · pence · total · change · subtract · add

1. Max sells an apple for £1.20 and a banana for £0.80. What is the total cost for both? (2 marks)

2. A customer gives Max £5.00 to pay for a melon that costs £3.50. How much change does Max owe? (2 marks)

3. Max has £2.00. He wants to buy a pear for £0.90. How much money will he have left? (2 marks)

4. If Max sells three oranges at £0.50 each, how much money does he have in total? (2 marks)

Extension challenge: If you had £10.00, which three items would you buy from Max’s stall? Write down the items and calculate the total cost.
