

Kit's Guide to Staying Safe Online

Be a Smart Explorer: Think Before You Click!

- **Keep your personal information, like your home address and school name, private. Never share these with people you do not know in real life.**
- **Choose a strong password with letters and numbers. Keep it a secret and only share it with your parents or carers.**
- **Always show kindness online. If you wouldn't say it to someone's face, do not type it on a screen.**
- **If you see something that makes you feel sad, scared, or uncomfortable, stop using the device and tell a trusted adult immediately.**
- **Remember, not everything you read online is true. Always check with a teacher or a parent if you are not sure about something you see.**

Did you know? Did you know? The internet is like a giant library that connects people all over the world! Just like in a real library, it is important to be polite, follow the rules, and ask for help if you find something that makes you feel worried or confused.

Key vocabulary: Password · Private · Kindness · Trusted Adult · Cyber · Information
