Amazing Animals and Humans

Join Nova the Owl and Bea the Bee on an adventure to discover the animal kingdom!

- **Mammals are animals that have fur or hair and feed their young with milk.**
- **Birds have feathers, two legs, and lay eggs in nests.**
- **Fish live in water and use their gills to breathe.**
- **Herbivores only eat plants, but carnivores eat other animals.**
- **Omnivores, like humans, enjoy eating both plants and meat.**
- **All humans need water, food, and air to stay healthy and grow.**

Did you know? Did you know? Humans are mammals, just like cats, dogs, and elephants! Unlike some other animals, humans can live in many different climates because we can build homes and wear clothes to keep our bodies at the right temperature.

Key vocabulary: Mammal · Bird · Reptile · Amphibian · Fish · Carnivore · Herbivore · Omnivore
