

Nova's Guide to Living Things

Join Nova the owl to discover the wonders of life on Earth!

- Living things need food, water, and air to stay healthy and grow.
- Living things can move on their own to find what they need.
- Living things can have babies or produce seeds to make more of their own kind.
- Non-living things, like rocks and toys, do not grow or need food.
- A habitat is a home where living things find shelter and protection.

Did you know? Did you know? All living things share seven special life processes. We remember them with the letters MRS GREN: Movement, Respiration, Sensitivity, Growth, Reproduction, Excretion, and Nutrition!

Key vocabulary: Living · Non-living · Habitat · Life processes · Environment
