# Zara the Zebra's Art Studio: The World of Pablo Picasso

Let's get creative! Look at the world in new shapes and colours, just like Picasso!

- **Pablo Picasso was a famous artist who liked to play with shapes and colours.**
- **He helped create a special style of art called Cubism, which uses many different shapes.**
- **Picasso painted faces that look like they are looking at you from the front and the side all at once.**
- **He used bright, bold colours to make his paintings feel full of energy and fun.**
- **You can be an artist too by drawing your friends using only triangles and circles!**

*Did you know? Did you know? Pablo Picasso loved to paint faces from different sides at the same time! He used squares, triangles, and circles to build his pictures like a giant puzzle.*

**Key vocabulary: Cubism · Portrait · Abstract · Shape · Colour · Pattern**
