Zara’s Guide to Sculpture

Let’s shape something amazing today with Zara the Zebra!

- **A sculpture is a 3D object that you can look at from all sides.**
- **Artists use materials like clay, wood, stone, or even recycled plastic to build their forms.**
- **You can make a sculpture by carving away bits of material or by adding bits together.**
- **Texture is how the sculpture feels, such as smooth, bumpy, or rough.**
- **Zara loves to use patterns to make her sculptures look unique and colourful.**

Did you know? Did you know? Sculptures are 3D, which means they have height, width, and depth. You can walk all the way around them to see the art from every side!
