Finn’s Fantastic Volcano Adventure

Join Finn the Dolphin as we dive deep into the fiery world of volcanoes!

- **A volcano is a special type of mountain that can open up at the top.**
- **Deep inside the Earth, it is so hot that rock melts into a liquid called magma.**
- **When the magma comes out of the top of the volcano, we call it lava.**
- **When a volcano releases lava, gas, and ash, we call this an eruption.**
- **Some volcanoes are active, which means they can erupt, while others are sleeping or extinct.**

> *Did you know? Did you know? Volcanoes can be found under the sea too! Finn the Dolphin has seen some amazing underwater volcanoes while exploring the deep blue ocean.*

Key vocabulary: Volcano · Magma · Lava · Eruption · Mountain · Ash
