

Finn's Weather and Climate Flashcards

Learning objective: To identify and define key terms related to weather and climate.

Read the front of each card. Try to guess the answer. Then, look at the back to check your learning. Use the word bank to help you.

What is the day-to-day state of the air outside?

Weather

What is the average weather pattern in a place over a long time?

Climate

How hot or cold the air is.

Temperature

Water falling from the sky as rain, snow, or hail.

Precipitation

A scientist who studies and predicts the weather.

Meteorologist

The imaginary line around the middle of the Earth where it is very hot.

Equator

The layer of gases that surrounds our planet.

Atmosphere

The amount of water vapour in the air.

Humidity

Moving air that you can feel on your face.

Wind

A long period with very little or no rain.

Drought
