

Max's Spooky Shop Maths

Learning objective: To solve addition and subtraction problems involving money in the context of a Halloween shop.

Help Max the monkey calculate the prices for his Halloween party treats. Colour in the items and solve the maths problems below.

Colour this: A friendly scene featuring Max the monkey wearing a small witch's hat. He is standing behind a wooden stall. On the stall, draw: one large round pumpkin with a price tag of £4, one spooky paper mask with a price tag of £3, and a packet of star-shaped stickers with a price tag of £5. Include outlines of autumn leaves and a large smiling moon in the background for children to colour in.

Steps:

1. Max buys a pumpkin for £4 and a spooky mask for £3. Label the total cost in the box below.
2. A packet of stickers costs £5. If Max pays with a £10 note, label how much change he receives.
