

Max's Shape Garden

Learning objective: To identify and draw 2D shapes with specific properties, including lines of symmetry and parallel lines.

Follow the steps below to draw a garden for Max the monkey. Use a ruler to make your lines straight and neat.

Draw: Create a garden scene featuring Max the monkey. Include a square flower bed, a rectangular stone path, and a triangular flag on a pole. Use clear, bold lines. Use a ruler for all straight edges. Add a dashed line through the square to show where it can be folded exactly in half (line of symmetry).

Label words: Rectangle · Square · Triangle · Parallel lines · Line of symmetry

Steps:

1. Step 1: Draw a square flower bed. Mark the lines of symmetry with a dashed line.
2. Step 2: Draw a rectangle path. How many right angles does your rectangle have?
3. Step 3: Draw a triangle flag. Label the sides that are the same length.
4. Step 4: Draw two parallel lines to show a fence post. Why are they parallel?
