

Zara's Autumn Art Adventure

Grab your pencils and paints—let's make something beautiful with nature!

- Autumn leaves can be many colours, like bright red, burnt orange, and sunny yellow.
- You can find interesting shapes and patterns on the ground, such as star-shaped maple leaves or round acorns.
- Using a crayon to rub over a leaf on paper creates a lovely texture called a 'leaf rubbing'.
- Conkers are shiny, brown seeds that fall from horse chestnut trees and are perfect for making autumn art.
- When you glue different natural items together, you are making a 3D autumn sculpture.

Did you know? Did you know? Trees change the colour of their leaves from green to red, orange, and yellow because they are getting ready for their winter sleep!
