

Kit's Cybersecurity Flashcards

Learning objective: To understand how to stay safe and secure when using computers and the internet.

Read the front of the card. Try to guess the answer. Then, look at the answer after the | sign. You can use the word bank to help you.

What is a secret code made of letters and numbers used to lock your account?	What do we call things that should not be shared with anyone online?
Password	Personal information
What should you do if someone you do not know messages you online?	What is a harmful computer program that can damage your device?
Tell a trusted adult	Virus
What word describes keeping your account safe from people who want to steal data?	What should you do if you see something online that makes you feel sad or worried?
Secure	Report it
What is it called when someone sends a fake email to trick you into giving away secrets?	Should your password be easy for others to guess, like '1234'?
Phishing	No, it should be hard to guess
Is it safe to share your home address or school name online?	Who is a person you do not know in real life?
No, keep it private	A stranger
What should you do before you click on a link in an email you do not trust?	Kit the fox says: Should you ever share your password with your best friend?
Ask a parent or teacher	No, never share your password
