

Mastering the Art of Instructions

Follow the Path to Perfect Precision!

- Why must instructions be written in chronological order for the reader to succeed?
- How do imperative verbs, such as 'mix', 'slice', or 'fold', create a sense of direct command?
- In what way do subheadings help the reader navigate a complex set of instructions?
- Why is it vital to use precise, technical vocabulary rather than vague, descriptive adjectives?
- How does the inclusion of an 'Equipment List' prevent errors before the process even begins?
- What is the purpose of adding a 'Top Tip' or 'Safety Warning' box to a set of instructions?

Did you know? Did you know? The very first instructional recipes date back over 4,000 years to ancient Mesopotamia! Even then, people used clear, step-by-step sequences to ensure their results were exactly as intended.

Key vocabulary: Imperative verb · Chronological · Adverbial · Subheading · Bulleted list · Concise
