

Exploring Amazing Asia with Finn the Dolphin

Dive into the biggest continent on Earth!

- Asia is the largest continent on our planet and covers about one-third of all the land on Earth.
- The massive Himalaya mountain range is found in Asia. It contains Mount Everest, the tallest mountain in the world.
- Asia has many different climates, from the freezing icy lands in the north to the hot, sandy deserts in the middle.
- Many people live in Asia. In fact, it has more people living there than any other continent!
- Finn the dolphin loves to visit the long coastlines of Asia, where he finds warm tropical seas and busy ports.

Did you know? Did you know? Asia is the largest continent in the world! It is so big that it touches three different oceans: the Arctic, the Indian, and the Pacific.
