

South America: A Continent of Wonders with Finn the Dolphin

Dive into discovery: Explore the majestic landscapes of the Southern Hemisphere!

- **The Andes Mountains form the longest continental mountain range in the world, stretching along the western edge of the continent.**
- **South America is home to the Atacama Desert, which is famously known as one of the driest places on the planet.**
- **The Equator crosses through northern South America, meaning many regions experience a tropical climate with high temperatures all year round.**
- **The Amazon Basin is the largest rainforest on Earth, playing a vital role in regulating the global climate by absorbing carbon dioxide.**
- **South America is comprised of twelve independent sovereign nations, each with a unique cultural heritage and diverse physical geography.**

Did you know? Did you know? The Amazon River is so vast that it contains approximately 20% of the world's total river water flowing into the oceans! It is home to thousands of unique species, many of which are yet to be discovered by scientists.
