

Max's Magnificent Division Station

Master the art of sharing with Max the Monkey!

- Division means sharing a total amount into equal groups.
- The number you start with is called the dividend.
- We use the division sign ($\div$) to show we are splitting numbers up.
- If you divide a number by 1, the answer stays the same.
- Division is the opposite of multiplication.
- Sometimes, you have a leftover amount called a remainder.

Did you know? Did you know? Division is the best way to make sure everyone gets a fair amount! If Max has 20 bananas and 4 hungry friends, he uses division to give everyone exactly 5 bananas each. It's like magic maths!

Key vocabulary: Dividend · Divisor · Quotient · Remainder · Equal groups · Share · Divide
