

Max's Spooky Maths Adventure!

Help Max the monkey solve the Halloween pumpkin puzzles!

- Max found 3 orange pumpkins and 2 white pumpkins. To find the total, we use addition: $3 + 2 = 5$ pumpkins.
- A small pumpkin costs £2 and a packet of spooky stickers costs £1. Together, they cost £3.
- If you have a £5 note and spend £4 on treats, you will have £1 left in your pocket.
- Counting by 2s helps us group items quickly. If you have 8 pumpkins in pairs, that makes 4 groups of two.
- Max uses a number line to jump forward. If he starts at 5 and adds 3, he lands on 8.
- Remember: 100 pence is exactly the same as £1. Always check your coins before you buy your treats!

Did you know? Did you know? The largest pumpkin ever grown weighed as much as a small car! Imagine how many slices of pumpkin pie that would make for a whole village.
