Max's Money Mastery: A Guide to Financial Fluency

Join Max the Monkey on a mission to master your money and make sense of every penny!

- **To find the total cost of multiple items, multiply the quantity by the unit price and add them together.**
- **Profit is calculated by subtracting your total expenditure from your total income.**
- **When working with money, always ensure your decimal points are aligned in a column before adding or subtracting.**
- **To find a percentage discount, calculate the percentage of the original price and subtract it from the total.**
- **Always round your final answer to two decimal places when dealing with pounds and pence (e.g., £4.50).**
- **A budget is a plan that helps you track your income and expenditure so you do not spend more than you have.**

Did you know? Did you know that the word 'salary' comes from the Latin word 'salarium'? In Ancient Rome, soldiers were sometimes given an allowance to buy salt, which was a very valuable resource at the time!

Key vocabulary: Profit · Loss · Budget · Expenditure · Income · Unit price · Value for money
