Nova the Owl’s Animal Adventure

Learning objective: To identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.

Colour in the picture of Nova the owl and her animal friends. Use your best colours to make them look bright and happy. Once you have finished colouring, label the different types of animals in the boxes provided.

Colour this: A friendly woodland scene featuring Nova the barn owl perched on a sturdy tree branch. Next to the tree, a small, fluffy rabbit is sitting in the grass (a mammal). In a small, clear pond at the bottom corner, a goldfish is swimming (a fish). Near the roots of the tree, a small green lizard is resting on a rock (a reptile). Include simple, clear outlines with thick lines, suitable for children to colour. The background shows a bright sun and two fluffy clouds.

Steps:

1. Label the bird in the picture.
2. Label the mammal in the picture.
