

Nova’s Guide to Classification Keys

Learning objective: To identify, name, and classify living things into broad groups according to common observable characteristics, and to construct and use classification keys.

Key Vocabulary

Use this vocabulary that to help you sort living things. I have grouped the terms into three categories: 'Sorting Science', 'Biological Features', and 'Key Construction'.

Explain why it is...	Compare and con...	Justify your ans... If you found an unknown...
What might happ...	If you were desig...	Create a simple b... A dog, a goldfish, and a..
