

Zara's Colorful Garden Adventure

Learning objective: To identify primary colors and explore how to create secondary colors through mixing.

Look at the colors Zara the zebra has found in the garden. Answer the questions about mixing colors and use your knowledge to create your own artistic patterns.

Zara the zebra loves to paint! She knows that Red, Yellow, and Blue are the primary colors. When she mixes them together, she makes brand new colors like Green, Orange, and Purple.

Word bank: Red · Yellow · Blue · Green · Orange · Purple · Mix · Bright

1. Zara has a pot of Red paint and a pot of Yellow paint. If she mixes them together, what color will she make? (1 mark)

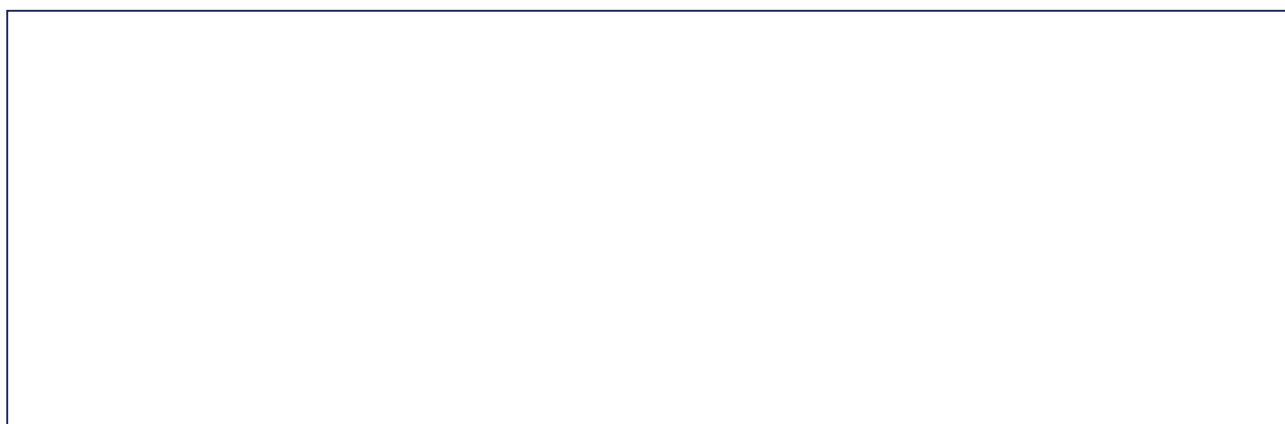

2. Which three colors are called the 'primary' colors? (3 marks)

3. If you mix Blue paint and Yellow paint, what color do you think you will see? (1 mark)

4. Zara wants to paint a bright flower. Name one color you would use to make it look sunny and bright. (1 mark)

5. Look at the world around you. Can you name one object that is the color Green? (1 mark)

Draw: Zara needs help finishing her painting! Use your pencils or paints to draw a garden. Try to mix two colors together to paint a big, beautiful flower with your new color.

Extension challenge: Find three objects in your classroom or at home that are each a different primary color. Tell a friend why you like those colors the best.
