

Zara the Zebra's Spooky Art Studio

Get your brushes ready! Let's make something magical and spooky together!

- Pumpkins are bright orange and round, just like a big, cheerful fall sun.
- We can use black paint to create spooky patterns like zig-zags and wiggly lines.
- Leaves turn beautiful colors like red, gold, and brown when the weather gets chilly.
- Making a mask is a fun way to use our imagination to pretend we are friendly woodland creatures.
- You can add glitter or shiny foil to your art to make it sparkle in the dark.

Did you know? Did you know? Pumpkins are actually a type of fruit called a squash! They grow in the fall and come in all sorts of shapes and sizes, perfect for turning into funny faces.
