

Zara the Zebra's Starry Night

Learning objective: To explore the artistic style of Vincent van Gogh by observing swirls, thick lines, and bright colors.

Look at the patterns in the picture. Use bright yellows for the stars and deep blues for the night sky. Try to make your lines swirly, just like Vincent van Gogh did!

Colour this: A large, friendly drawing of Zara the Zebra standing in a field looking up at a night sky. In the sky, there are large, circular, swirling stars and a crescent moon with thick, bold outlines. Zara is holding a paintbrush and looking at the sky with wonder. The landscape includes a simple, rolling hill and a tall, cypress tree that looks like a flickering flame, drawn with thick, wavy lines to match Van Gogh's style. The background features thick, circular swirls to represent the wind in the night sky.

Steps:

1. Label the big, bright star in your picture.
2. Label the swirling patterns in the sky.
