

Weather and Climate: Exploring Our World with Finn the Dolphin

Dive into the skies and seas! Read these facts to become a Weather Wizard.

- **Weather changes every day.** It can be sunny in the morning and rainy by the afternoon.
- **Climate is the usual weather pattern of a place.** Some places have a hot climate, while others are very cold.
- **We use a thermometer to measure the temperature,** which tells us how hot or cold it is outside.
- **Precipitation includes rain, snow, sleet, and hail.** It is water falling from clouds in the sky.
- **The Earth has different climate zones,** such as polar, temperate, and tropical regions.

Did you know? Did you know? Weather is what is happening outside your window right now, like rain or sunshine. Climate is the average weather pattern in a place over a very long time, usually 30 years or more!
