

Max the Monkey's Addition Adventure!

Add it up with Max! Follow these steps to become a Math Master.

- Always start adding from the ones column on the far right.
- If your answer in a column is 10 or more, you must exchange into the next column.
- Keep your numbers lined up neatly in their correct place value columns.
- Adding zero to any number does not change the value of that number.
- The total is the final answer you get after adding two or more amounts together.

Did you know? Did you know? The word 'plus' comes from Latin! It means 'more'. Max the Monkey loves using addition to count all the bananas in his jungle store.
