Max’s Magical Christmas Math

Help Max the Monkey solve the Christmas puzzle! Math makes the festive season sparkle.

- **To find the total cost of two gifts, add the prices together. If a toy costs £4.50 and a book costs £3.20, the total is £7.70.**
- **When you pay with a £10 note, subtract the cost of your items from £10 to find your change.**
- **If one box of mince pies costs £2, you can multiply by 3 to find the cost of three boxes, which is £6.**
- **To find the difference in price between a £5 decoration and a £3 decoration, subtract the smaller number from the larger number to get £2.**
- **Max always checks his budget by adding up all the items in his basket to make sure he has enough money.**

Did you know? Did you know? If you have 12 crackers and you share them equally between 4 friends, each friend gets 3 crackers. That is a festive division fact!
