

Max the Monkey's Rounding Rules!

Round it Right with Max the Monkey!

- Look at the digit to the right. If it is 0, 1, 2, 3, or 4, we round down and keep the number the same.
- If the digit to the right is 5, 6, 7, 8, or 9, we round up to the next ten or hundred.
- To round to the nearest 10, look at the ones digit. If it is 5 or more, go up!
- To round to the nearest 100, look at the tens digit. If it is 5 or more, round to the next hundred.
- Max says: Always check your place value columns to make sure you are rounding the right digit!

Did you know? Did you know? Rounding is a very clever way to make big numbers easier to use! If you have £48, it is much easier to say you have 'about £50' when you are planning what to buy at the store.
