

Max the Monkey's Shape Flashcards

Learning objective: To identify and describe 2D and 3D shapes, including properties like sides, vertices, and faces.

Read the front of the card. Try to guess the answer. Then, look at the back to check if you are right. Use the word bank to help you.

A shape with 3 sides and 3 corners.	A 2D shape with 4 equal sides and 4 right angles.
Triangle	Square
A 2D shape that is perfectly round with no corners.	The point where two lines meet on a shape.
Circle	Vertex
A 3D shape that looks like a box with 6 square faces.	A apartment surface on a 3D shape.
Cube	Face
A 2D shape with 4 sides where opposite sides are equal in length.	A 3D shape that is round like a ball.
Rectangle	Sphere
Lines that stay the same distance apart and never touch.	An angle that is exactly 90 degrees, like the corner of a book.
Parallel lines	Right angle
How many faces does a cube have?	How many vertices does a square have?
6	4
