

Bea's Garden Adventure: Parts of a Plant

Learning objective: Identify and describe the functions of different parts of flowering plants (roots, stem, leaves, and flowers).

Hello! I am Bea the honeybee. I need your help to label my favorite flowers. Use the words from the word bank to fill in the blanks. Think about what each part does to help the plant grow big and strong.

Word bank: roots · stem · leaves · flower

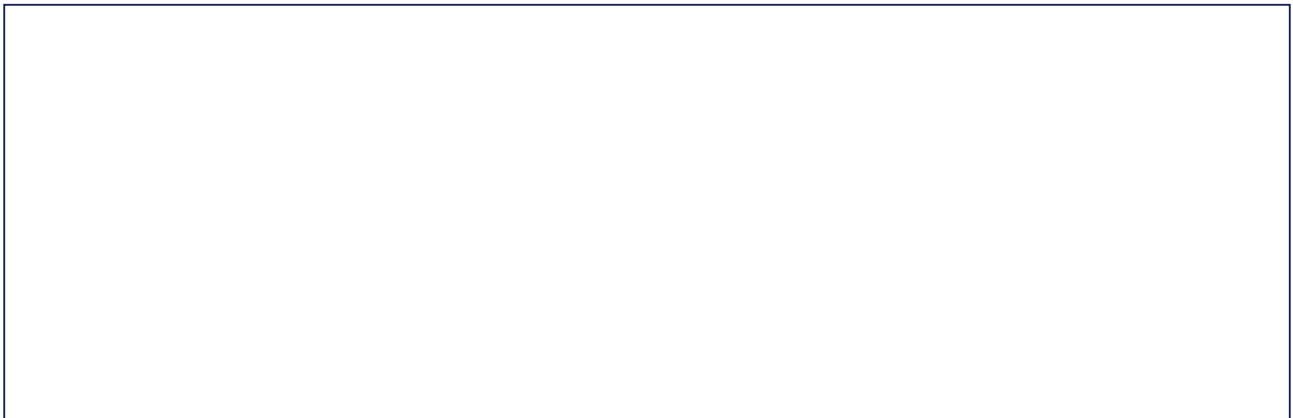

1. 1. The _____ grow under the soil. They soak up water for the plant. (2 marks)

2. 2. The _____ stands up tall. It acts like a straw to carry water to the rest of the plant. (2 marks)

3. 3. The green _____ catch sunlight to help the plant make its own food. (2 marks)

4. 4. The colorful _____ makes seeds so new plants can grow. (2 marks)

Draw: Draw a picture of a sunflower. Label the roots, stem, leaves, and flower using the words from the word bank.

Extension challenge: Think about what a plant needs to stay alive. Can you write two things a plant needs to grow, such as water or sunlight?
