A Bright Night: Celebrating Bonfire Night

Gather 'round! Join Pip the caterpillar as we discover why the sky lights up every November.

- **Bonfire Night takes place every year on the 5th of November to remember a historical event from 1605.**
- **People often build a large bonfire outdoors to stay warm while watching the night sky.**
- **Bright fireworks are launched into the air to create beautiful patterns of light, colour, and sound.**
- **Many people enjoy eating warm treats like toffee apples or baked potatoes whilst standing by the fire.**
- **Always remember to stay safe and stand well back from the fire and the fireworks at all times.**

> *Did you know? Did you know? The very first fireworks were invented over 2,000 years ago in China, but they were used to make loud noises to scare away bad spirits, not just to make pretty colours!*
