Mastering Verbal Reasoning with Max

Think Like a Monkey: Unlocking the Patterns in Words!

- **An analogy shows the relationship between two pairs of words. If 'Hot is to Cold' (antonyms), then 'Big is to Small' follows the same logical pattern.**
- **Synonyms are words that have the same or very similar meanings, such as 'Enormous' and 'Gigantic'.**
- **An anagram is a word formed by rearranging the letters of another word, like 'Listen' becoming 'Silent'.**
- **Sequencing involves finding the next word in a list based on a specific rule, such as alphabetical order or category grouping.**
- **Prefixes are added to the start of a root word (e.g., 'un-' in 'unhappy'), while suffixes are added to the end (e.g., '-ness' in 'kindness').**

Did you know? Did you know that verbal reasoning is like a mental gym for your brain? By identifying the hidden relationships between words, you aren't just learning vocabulary—you are training your mind to spot connections, solve complex puzzles, and think more clearly in every subject you study!
