

Writing a Brilliant Biography

Unlock the story behind the person: Become a biographer today!

- **Biographies are written in the third person (he, she, they) to ensure the writer remains objective and professional throughout the narrative.**
- **The events in a biography are almost always presented in chronological order, following the subject from their early life to their final achievements.**
- **Effective biographies include anecdotes—short, interesting stories about the subject—which help the reader understand the person's character and personality.**
- **A good biographer uses precise vocabulary to describe the subject's impact on history and the legacy they left behind for others.**
- **Biographies often include direct quotes or references to interviews to provide evidence and make the subject feel more real to the reader.**

Did you know? Did you know? Biographers often spend months or even years researching their subjects. They look through old letters, diaries, and photographs to piece together the truth about a person's life before they write a single word!

Key vocabulary: Chronological · Third-person · Subject · Anecdote · Legacy · Perspective
