# Online Safety Superstars

*Learning objective: To understand how to stay safe, respectful, and responsible when using the internet.*

Read the front of each flashcard to test your knowledge about staying safe online. Flip to check if your answer matches the definition provided.

**What is a 'Digital Footprint'?**

It is the trail of data and information you leave behind whenever you use the internet, such as posts, photos, and search history.

**Why should you keep your personal information private?**

To protect your identity and safety; personal information includes your full name, home address, school name, and telephone number.

**What is the best way to create a 'Strong Password'?**

Use a mix of at least 8 characters, including upper and lower case letters, numbers, and symbols that are not easy for others to guess.

**What should you do if someone is being unkind to you online?**

Do not reply, save evidence by taking a screenshot, block the user, and tell a trusted adult immediately.

**What are 'Privacy Settings' on social apps or games?**

They are controls that allow you to decide who can see your profile, send you messages, or view the content you post.

**Who is a 'Trusted Adult' you can talk to about online worries?**

A parent, carer, teacher, or any other adult you know well who can help you resolve problems safely.

**Why is it important to think before you post or share online?**

Because once something is shared on the internet, it can be very difficult to delete or control who sees it.

**What does it mean to 'Report' a user?**

It means using the built-in safety tools on a website or app to tell the platform administrators that a user is breaking the rules or acting inappropriately.

**Is everything you read or see online true?**

No, you should always check facts from reliable sources because people can post misleading information or 'fake news' online.

**How should you treat others when communicating online?**

You should always follow the 'Golden Rule': treat others with the same kindness and respect that you would show them in person.

**What should you do if an online game or app asks for your location?**

Always say 'No' or 'Block' and tell a trusted adult, as sharing your real-time location is a safety risk.

**If Max (the maths-loving monkey) sees a pop-up saying he has won a prize, what should he do?**

He should ignore it and close the window, as it is likely a scam designed to steal personal information.
