Staying Smart and Safe Online with Kit the Fox

Be a Digital Detective: Think, Check, and Protect!

■ **Keep your personal information private. Never share your full name, home address, school name, or passwords with anyone you do not know in real life.**

■ **If you see something online that makes you feel sad, worried, or uncomfortable, stop what you are doing and tell a trusted adult immediately.**

■ **Treat others with the same kindness online as you do in the classroom. Cyberbullying is never acceptable, and your words have a real impact on others.**

■ **Not everything you read online is true. Always check if a website is trustworthy or ask an adult to help you verify the information.**

■ **Use strong, unique passwords for your accounts and never share them with friends. Think of a password like a secret key that only you should have.**

■ **Privacy settings are your best friend! Ask an adult to help you set up your accounts so that only the people you actually know can see your profile.**

Did you know? Did you know? Every single time you click a link, upload a photo, or play a game online, you are adding to your 'Digital Footprint'. This is a trail of information that stays online for a long time, so it is important to always be kind and careful about what you share!

Key vocabulary: Cyberbullying · Personal information · Privacy settings · Digital footprint · Password · Trustworthy
