Kit’s Cybersecurity Shield: Your Digital Safety Plan

Learning objective: I can identify potential online risks and explain how to protect my digital identity.

About 15 minutes. Grown-up tip: Please read through these safety questions with your child to discuss their online experiences and ensure they know who to talk to if they feel worried.

Use this template to build your own safety guide. Think about how Kit the fox uses clever solutions to keep data secure.

Worked Example: For 'Strong Passwords', you might write: 'Do not use your name. Use a mix of symbols, numbers, and both upper and lower case letters.'

Word bank: Encryption · Phishing · Password · Privacy · Secure · Identity · Auth · Malware · Report

1. The Golden Rules of Passwords: Describe three things that make a password strong and difficult for others to guess. (3 marks)

2. Spotting Phishing: What are the warning signs of a suspicious email or message asking for your personal information? (3 marks)

3. Privacy Settings: Why should you keep your social media or gaming profiles set to 'private' when using the internet? (2 marks)

4. Digital Footprint: Explain what a 'digital footprint' is and why it is important to think before you post or share online. (3 marks)

5. Taking Action: If you see something online that makes you feel uncomfortable or worried, what are the exact steps you should take? (3 marks)

Extension challenge: Design a 'Cyber-Hero' mascot for your school. Write a slogan that encourages other pupils to think before they click.

I did it! Name: _____ Date: _____

Too easy? Try Greater Depth. Too tricky? Try Supported. More at bookflik.com/resources
