Kit's Clever Computing: Organising Our World

Learning objective: I can collect, represent, and interpret data using pictograms and bar charts.

About 15 minutes. Grown-up tip: Ask your child to explain what the 'scale' tells us about the chart.

Key Vocabulary

Data is just information. We use charts to make data easy to read. Look at the Word Mat below to help you.

Example: If 4 children like apples and 2 like pears, a pictogram might show 4 pictures for apples and 2 for pears. If one picture stands for 2 children, I would draw 2 pictures for apples (2+2=4) and 1 picture for pears.
