Mastering Data: Computing Detectives

Learning objective: I can identify, organise, and interpret digital data sets to answer specific questions.

About 15 minutes. Grown-up tip: Ask your child to explain the difference between sorting a list of names and filtering them.

Key Vocabulary

Use this vocabulary mat to help you organise information. To find the 'mean', add your data values together and divide by the total number of items. Example: For the set {2, 4, 6}, the mean is 12 ÷ 3 = 4.
